

Beistoffe in zugelassenen Pflanzenschutzmitteln

Alle Beistoffe, die in der Formulierung eines Pflanzenschutzmittels enthalten sind, müssen bei einem Antrag auf Zulassung nach den Vorgaben der Verordnung (EU) Nr. 284/2013 durch den Antragsteller oder Hersteller charakterisiert werden. Anzugeben sind der Handelsname und die Zusammensetzung. Die einzelnen Beistoffsubstanzen sind quantitativ (i.d.R. Gehalt $\geq 0,1\%$) und qualitativ (chemische Bezeichnung nach IUPAC und CA Index, Struktur sowie CAS- und EC-Nummer) anzugeben.

In der folgenden Liste sind 1815 Beistoffe alphabetisch aufgeführt, die mit Stichtag 01. November 2020 in einem zugelassenen Pflanzenschutzmittel enthalten sind und deren Zusammensetzung dem BVL ausreichend bekannt ist.

Zu diesen Beistoffen sind Angaben zur Zusammensetzung in der Regel nicht mehr notwendig. Lediglich ein aktuelles Sicherheitsdatenblatt gemäß der Verordnung (EG) 1907/2006 in der momentan gültigen Fassung muss dem Zulassungsantrag beigefügt werden. Das BVL behält sich vor, die Zusammensetzung der hier gelisteten Beistoffe zur Überprüfung anzufordern.
